Comments and Questions:

The MT analysis an access to healthcare for asylum seekers in Italy, from the perspective of disparities between legislation and practice. The MT has a clear structure, goals and methodology. Nevertheless, the period of analysis should have been strictly maintained and the systematic literature review should have been added by on-site interviews in the mentioned cities (iterviews would have been more relevant than information sources used)and would underline the individual contribution and independence in development. Some parts of the MT have only indirect relation to the MT topic. All in all, the MT fulfills the requierements given on this type of academic work.

Conclusion: The Master Thesis is recommended for the defence.
