***Overall evaluation and questions to be answered in the course of the defense:***

This master thesis is focused on interesting topic – corruption in the Czech-German companies. The theoretical part is based on rich list of literature, is logically structured. The chosen methods (interviews and questionnaire) correspond with the goal of the thesis. I would recommend a deeper analysis of the interviews. The paper well fulfills requirements for master thesis. Questions: What was the main motive for choosing this topic? Do you have personal experience with corruption? How to build organizational culture to prevent corruption?
