Comments and Questions:

Equity valuation seems to be a very traditional topic. It is really difficult to come up with anything new in this field. Nevertheless, the author showed both theoretical as well as practical experience and wrote a high quality thesis. Although he set many objectives he was able to fulfill all of them. As there are no relevant shortcomings in the thesis I suggest an excellent grade.

Questions:

1. Which method would you use to evaluate cryptocurrencies?
2. The clients of Ascom are mainly public hospitals. Is there any effect on the margin compared with private companies?

Conclusion: The Master Thesis is recommended for the defence.

Suggested Grade: **1**
