Overall evaluation and questions to be answered in the course of the defense:

I could not find much details about survey. More information about sample selection, administration of the survey etc. could have been provided. Moreover, although I think the topic is interesting and of practical value, the author could have used more robust analysis to further convince readers about the outcome/findings. I would have like to see how the outcome of this thesis could be used by marketing professionals to launch healthy food in Czech or in different countries. This is particularly important. Sometime it is difficult or may be impossible to motivate people towards healthy food option, especially in Czech. Therefore, author could have provided more details on this (how to promote/launch health food options etc.). Author could have summarized all tables/graph and include a table of key findings to help readers to understand the key outcome. At the moment, there are many graphs and it could be little difficult to combine the overall findings. In sum, although the topic was interesting, author could have provided more insights.
